PROFILE SUMMARY

Detail-oriented and motivated Data Engineer with knowledge of Python, SQL, and database technologies. Skilled in problem-solving and data processing, with hands-on experience in academic and personal projects. Seeking opportunities to develop expertise in ETL, Data Warehousing, Cloud Technologies, and Big Data systems.

TECHNICAL SKILLS

Languages: Python, SQL

Databases: MySQL, PostgreSQL

AI & NLP: NLP, Sentence Transformers

Tools & Technologies: Git, GitHub, VS Code

Data Analysis: Pandas, NumPy, Matplotlib, Seaborn

Core Concepts: Data Structures & Algorithms, OOPs, DBMS

PROJECTS

RecruitAI – AI-Powered Candidate Ranking Platform

Python, FastAPI, Next.js, PostgreSQL, SQLAlchemy, NLP, Sentence Transformers

- Developed a full-stack recruitment platform for automated resume screening and candidate ranking.
- Implemented resume parsing, skill extraction, and semantic matching using NLP and Sentence Transformers.
- Built REST APIs with FastAPI and PostgreSQL, and designed an interactive dashboard using Next.js.

Chess Engine with AI Opponent

Python, Pygame, Minimax, Algorithm, Alpha-Beta Pruning, Object-Oriented Programming

- Developed a chess engine with complete chess rules and an interactive GUI using Pygame.
- Implemented an AI opponent using Minimax Algorithm with Alpha-Beta Pruning for optimized move selection.
- Added features such as move validation, highlighting, undo functionality, and customizable AI depth.

CERTIFICATES

- Udemy Complete Python Programming: From Basics to Advance
- Smart India Hackathon Participation Certificate

EDUCATION

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

Bachelor of Technology in Computer Science and Engineering CGPA: 8.83

VIG ENGLISH SCHOOL

Intermediate Percentage: 72.8%

VIG ENGLISH SCHOOL

Matriculation Percentage: 72.2%
